

About ZeroDivide:

ZeroDivide invests in community enterprises that leverage new technologies to benefit people in low-income, minority and other disadvantaged communities. As a foundation, ZeroDivide provides more than just funding; through community, philanthropic and corporate partnerships, we help nonprofit organizations find new revenue sources to become more self-sustaining.

The ZeroDivide Fellowship is a strategic initiative of ZeroDivide designed to:

- Build a community technology movement that benefits and improves the quality of life for underserved communities.
- Cultivate a network of diverse community leaders who will shape the field of community technology and move a policy agenda reflective of their communities.
- Support the work of California community leaders in advancing a social justice agenda.

About MoAD:

The **Museum of the African Diaspora** (MoAD) is the first major museum in the world focused on the African Diaspora. MoAD connects all people through the celebration and exploration of the art, culture and history of the African Diaspora. MoAD promotes, explores, and appreciates the contributions people of African descent have made across the globe.
